- Stand-Alone System
- Accurate Way to Match Shelf Labeling & Pricing
- Print Receipt for POS Review and Comparison
- Requires no Interface to the Current POS System
- Works with any Bar Code
- Generate Replacement Shelf Labels

## MOBILETE<sup>WM</sup>

### Weights & Measures

MOBILETE<sup>WM</sup> was developed for state and local departments of Weights & Measures to simplify the auditing process. Agents can use a best of breed PDT to improve productivity and boost accuracy. Audits that could take three hours now only take one - a 200% increase in productivity!

## Excellent for Auditors

Government Weights & Measures officials need an easy, productive, and accurate way to match shelf labeling with point-of-sale (POS) pricing.

With the **MOBILETE<sup>WM</sup>** Price Auditing Solution, it's easy to make certain shelf prices match the POS system. Instead of carrying merchandise or groceries to the register, you can scan the products on the shelf and record and print errors on the spot: No walking back and forth to the checkout for scanning.

Because agents can check pricing labels on the spot, Weights & Measures officials have found that **MOBILETE<sup>WM</sup>** provides a quick and easy price verification system that's 200% more efficient than manual audits.

## Perfect for Retailers

No one wants to lose consumer confidence or be penalized because the store's shelf labels don't match POS pricing.

Don't wait to be audited! The **MOBILETE** Weights and Measures Price Auditing System allows retailers to perform store audits on their own.

If discrepancies are found, you can print replacement shelf labels on the spot! No more waiting for the home office to send more labels or going to the back room to print.

## How It Works

**MOBILETE** Weights and Measures require no interface with the POS system. Simply take it out of the box and you're ready to go!

Just follow these easy steps:

Enter store name, scan shelf labels, and enter the price. **MOBILETE** Weights and Measures will print a complete receipt with bar code and price. Scan the receipt at the POS and compare the results.

It's that easy!
