

# Ticket Maker Ticket Maker Ticket Maker **TM** Point, Click, and Print Ticket Maker Ticket Maker Ticket Maker

## Daryl Wine Bar & Restaurant Solution

**Background:** Daryl Wine Bar & Restaurant was looking to open as part of the New Brunswick, New Jersey Renaissance. The swanky, upscale establishment provides and encourages its customers to purchase the wines from its large, prestigious collection.

**Challenge:** The challenge was for Daryl to have a barcoded inventory that would allow the same level of simplicity and accuracy for a patron purchasing the wine as it would in the purchasing of a meal.

**Solution:** **TM** was chosen to provide the ticketing database and ticketing for the wine bar.

**TM** was recommended to Daryl by Micros (their POS provider). It allows for a surefire interface between the POS and the TM package.

This prevents the user from having to enter the data twice. Daryl creates the SKU and its relevant information in Micros and the data is used in **TM** to provide tickets and labels closing the loop when the cashier scans the barcoded label at the point of sale.

**TM** provides for Daryl to support multiple barcode formats and a relatively unlimited SKU growth. **TM** can print both individual tickets as well as in batch mode.

**TM** is a product of **pss** Incorporated and is available via [www.pssproducts.com](http://www.pssproducts.com) or from select resellers and distributors specializing in restaurant verticals.

**About Daryl:** Sharing perfectly paired fine food and wine in a friendly, comfortable environment is the reason Daryl opened its doors. Executive Chef David Drake has developed a unique Creative American cuisine. The concept is sharing, and every plate is designed with that in mind.

At Daryl, it is really about discovery and an active dining experience, from beginning to end.

**About pss:** **pss** is a software solution development company specializing in the auto ID industry (AIDC) serving multiple verticals. **pss** is the developer of **TM** (*Point, Click, and Print* for ticketing); **MOBILETY** (portable processing made easy) for PDT and PDAs; Optimark Food Safety made simple ( sold exclusively by Daymark, Inc.); and FreshMarx 9415 marketed by FreshMarx.
