MOBILETY certifies the UNITECH HT660

MOBILETY is a powerful, configurable, user-friendly package designed for handheld users in a variety of markets: Distribution, Field Mobile, Grocery, Health Care, Hospitality and Retail. Soon you can see www.pss-products.com for more information.

“We believe that partnering with Unitech as an ISV (Independent Software Vendor) will produce more opportunities for both companies, as **MOBILETY** provides the solution component required by many Unitech resellers,” states Vince Spinelli, **pss** Business Solutions.

The HT660 is a compact and rugged data collection handheld terminal ideally suited to mobile applications, including warehouse and in-store retail. The versatile design of the HT660 offers a variety of communication methods, including Bluetooth, 802.11b/g and WiFi.

ABOUT pss

Point of Sale System Services, Inc., headquartered in Shirley, MA, is a privately held company specializing in **MOBILETY**. **pss** is a complete solution provider committed to maximizing the customer’s technology life cycle through progressive migration strategy and long-term product commitment. **pss** provides complete solutions including POS hardware and software, handheld devices and applications, service bureau facilities, and a full complement of hardware maintenance options.

ABOUT UNITECH

Unitech was founded in 1979 in Taipei, Taiwan, to provide the local market with customized microprocessor-based automation systems. For the past 20 years, Unitech has been focusing on automatic data collection products and services to enhance productivity and efficiency. In 1985 we successfully launched our AIDC product lines, which have been growing ever since. Today, we manufacture a full range of AIDC products, including barcode scanners, magnetic card readers, portable and fixed terminals, and a variety of keyboard products.
