

In Store Ticketing & Markdowns

MOBILETY is a stand-alone module that is fully interfaced to Cegid Client Server and Web Access software (version 7.0).

MOBILETE In Store Ticketing & Markdowns Solution Highlights:

- Markdowns
- Price Changes
- Remedial Ticketing
- Drop Ship Ticketing
- Shelf Labels
- Shoe Box Labels
- Hang Tags

MOBILETY + Cegid + Avery-Dennison = An optimum solution.

MOBILETY is certified on the Avery-Dennison Pathfinder Ultra.

When combined with the “best of breed” handheld products, the broadband of business criteria considered in the development of **MOBILETY** forms a complete solution. This truly makes **MOBILETY** a multifunction engine that will add functionality, increase productivity, and improve the ROI of your Cegid software purchase.

MOBILETY is operational in Batch with ActiveSync communication, 802.11b/g for RF and WiFi communications, and CDMA/EVDO for Cellular communication.

MOBILETY supports Bluetooth device-to-device communications.
