

Retail

MOBILETY brings the complete capabilities of full scale POS to the mobile environment: sales, returns, exchanges, special orders, and layaways are all at your fingertips. Complete support of discounts by percent or dollars, markdowns, coupons, or promotional pricing can be performed at the kiosk or at the front door. Accepting cash, credit, checks, or gift cards on the sidewalk, in the tent, or at the convention center, POS is now as versatile as your business needs.

MOBILETY also provides the complete capabilities of retail data collection to the mobile format. Receiving, transfers, inventory, RTVs, and cycle counts are all readily available. Complete support of re-ticketing for markdowns, markups, and return goods, along with in-store generation of shipping labels, customer IDs, coupons, and gift registry list, can now be performed at the point of interaction rather than where the computer sits.

Exposition	Retail
Sales Customer Capture Coupon Generation Booth Traffic Tracking	Sales Returns Markdowns Special Order Gift Registry

The **MOBILETE** terminal application is a complete stand-alone application providing a touch screen environment for seasonal expansion, line busting, kiosk, and all other forms of sales environments. The **MOBILETY** suite is also capable of interfacing to your existing POS and able to support your current PLU.

Manufacturing & Distribution

MOBILETE is a complete stand-alone application providing a touch screen environment for shipping, receiving, product identification, and inventory. **MOBILETY** has the capability to address the needs of distribution, warehousing, transportation logistics, and field service delivery.

When combined with the “best of breed” handheld products, the broadband of business criteria considered in the development of **MOBILETY** forms a complete solution. This truly makes **MOBILETY** a multifunction workhorse designed to increase productivity and profit throughout the retail supply chain.
